ABOUT US

Advance Apex Building Solutions is a Dubai-based HVAC installation and maintenance company specializing in commercial, industrial and residential projects. Well beyond the design, supply, installation and maintenance of HVAC projects, AABS strives to be a trusted extension of our customers' operation. Our goal is to consistently meet and exceed customer expectations in product & service quality, sales support, rapid response, and reasonable pricing.

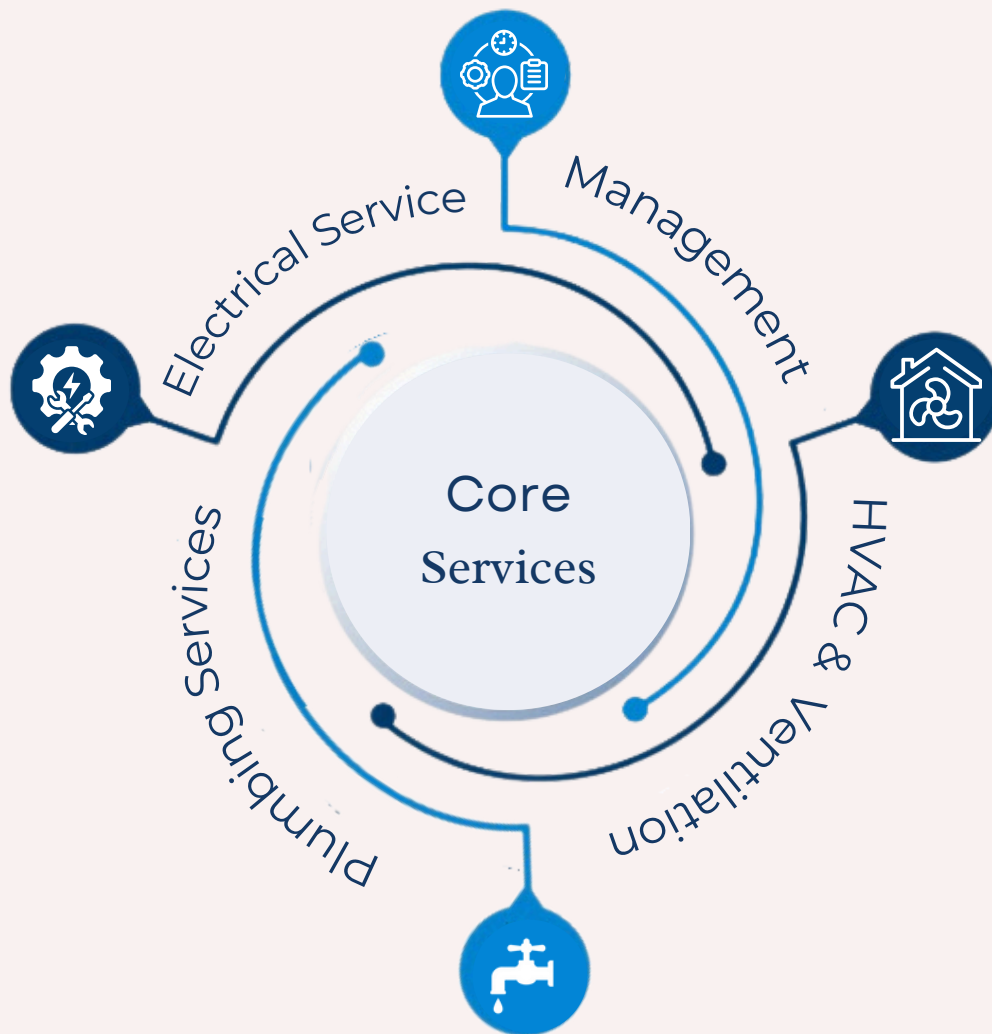

Inspite of being a young company, Advance Apex Building Solutions has more than 50+ years experience years with its team. AABS able to offer a business approach unmatched by large, multi-tiered corporations. In fact, we have built our business model and culture on key differentiators that make us unique in the electro-mechanical products industry.

» FACILITY MANAGEMENT

AABS providing Electromechanical equipment's maintenance as well as projects to a more technical degree including mechanical and electrical maintenance on project services.

AABS offer total facility management and integrated services packages. Clients will gain the advantage of outsourcing these services whilst simultaneously simplifying delivery, improving quality and generating further cost efficiencies.

SERVICES

MECHANICAL MAINTENANCE | ELECTRICAL MAINTENANCE | SOLAR PV
PANEL MAINTENANCE & CLEANING

MARINE HVAC MAINTENANCE

A ship air conditioning system plays a major role in the comfort of passengers and crew and when it comes to the quality of the transported goods. The onboard AC system allows the crew to carry out their daily tasks in a comfortable environment
